If you would know the Interest of one Hundred Pounds for one Month, two Months, three Months, six Months, nine Months, or one Year, look for 100. in the Side; and in the next Column, under one Month, is 8s. 4d. for two Months 16s. 8d. for three Months 11. 5s. for six Months 21. 10s. for nine Months 31. 15s. and for a Year 51. and so of the rest.

This is the honest Way by which Men should
To Interest let their Silver and their Gold;
Yet worldly Misers, when to Raking fall,
They with their Interest get the Devil and all.

INTRODUCTION

To the ensuing Prognostications.

O THOU great Wonder-working Power above!
By whom the Machine of th' whole World doth move,
Who rulest both Sword and Sceptre with a Rod,
And stillest this tumultuous World with thy sole Nod.
Inspire our glorious George; and gently shed
Showers of Sceptres on his Royal Head.
His Bosom Tutor, and his Safety tender;
O be Thou His! as He's thy Faith's Defender.
That we m' enjoy Saturnian Days of old,
To re-convert our Iron into Gold:
With these throng'd Blessings was his Grandfire crown'd,
Thrice Eleven long Summers, leaving a renown'd
And Princely Progeny! O may't secure
This Throne, as long as Sun or Stars endure!
But may his Sceptre and his Regal Power,
Brook no Corral, nor Competitor.
There, may both Peace and Unity long reign
In loyal Hearts, and always there remain,
Free from Dissentions, Feuds, and evil Actions,
Plots, and Conspiracies, and knavish Factions.
Thus Greatness join'd with Goodness make compleat;
But few there are, like George, both good and great.
They're Qualities too rarely known to fall
Within the Compass of the self-same Scale:
Yet are they poiz'd in him, divinely met,
For Piety makes him good, and Prudence great.
Piety! Oh! 'tis that inexhausted Mine,
And Magazine of Moral and Divine
Graces, which, like the Influence, and the bright
Beams of the Sun, fill Britain with their Light.
And may their blazing Rays flame thro' the whole
Earth, from the Artick to th' Anthartick Pole!

IT is necessary to be remembered, That by Virtue of an Act of Parliament made in the Year 1751, for Alteration of the Stile, the Beginning of the Year was changed from the 25th of March to the first Day of January. This Change took place on the first of January, 1752; and the Act enjoins and directs, That from and after that Time, every succeeding first Day of January, in every Year to come, shall be the first Day of every Year respectively; and that all Deeds and Writings, of what Nature and Kind soever, shall be dated accordingly.

In Consequence of the same Act of Parliament, the Use of the Julian Account or Old Stile, heretofore followed in this Country, ceased on the Second of September of the same Year, 1752; and by dropping or leaving out eleven nominal Days, and calling the next, which would have been the third, the fourteenth, the New Stile took place; and from thence, by the said Act, is directed to be used for all Time to come, in all his Majesty's Dominions subject to the Crown of Great-Britain. By this Alteration, the several Fixed or Immoveable Feasts, as they are ordered to be placed in the New Calendar upon the same nominal Days of the respective Months as they were placed upon in the Old, will come eleven Days earlier than they would otherwise have done, and thereby make all Things depending upon them, such as the Opening or Inclosing of common Fields and Pastures, the Holding of Fairs and Markets, the Payments of Rents and Annuities, and the Commencement or Extinction of many private Rights and Matters of Property, do the same: To prevent therefore any Inconvenience arising therefrom, the Act provides and directs, That the Opening or Inclosing of Pastures, the Payments of Rents, Annuities, and all other Things depending on the Fixed or Immoveable Feasts, shall not by this Means be accelerated or forwarded; but that the Days of Opening or Shutting such Pastures, of paying such Rents or Annuities, and of doing such other Matters and Things formerly to be done and performed on the said Feasts, shall be Kept, Observed, and Performed on the same Natural Days of the Year on which the same Feasts would have fallen if this Act had not been made. For this Reason the fifth of April is called Old Lady-Day, and the 10th of October, Old Michaelmas-Day, and so of the rest, as being the respective Days on which all such Rents and Payments become due, such Rights take place, and such Matters and Things to be done, and not before. All that is here said relates to the several Things above-mentioned depending on Fixed or Immoveable Feasts; but all such as depend on Moveable Feasts, or Days depending on them, are to take place, and be reckoned according to the New Calendar, in Pursuance of an Act of Parliament of the Year 1752, for amending the former Act of the Year 1751.

N. B. That all Dates of Births, Deaths, or other remarkable Events in the Regal or Chronological Tables, prior to, or upon the Second of September, 1752, are to be understood according to the Julian Account, or Old Stile.

Lands surveyed, divided, and enclosed, and Maps of the same correctly delineated, and Timber and Polewood surveyed, valued, and sold, by VINCENT WING, of Pickworth, in the County of Rutland, and THOMAS WRIGHT, of Eaton, in the County of Leicester, Practitioners in the Mathematicks.

Look back, my Muse, and view that wholesome Care
Of English Patriots, who did prepare
That just harmonious Model of our Law,
Whereby both King and People jointly draw,
Whereby their Goods are so com-mix'd together,
One can't be blest but it must reach the other.

Whereby the King's install'd with Royal Power,
But is so qualified he can't devour
Those little Rights which justly appertains
Unto those People over whom he reigns;
Nor dare the People to invade the Throne,
But Law confines the Subject and the Crown.

The Paths of Greatness do but slippery prove,
Full oft to those that do Ambition love,
Their cursed dark Designs to Light are brought,
For there's a Key unlocks each secret Thought.
A holy Plot, or no pretended Cause,
Can e'er ensnare us, or o'erturn our Laws.

THE brightest of the 7 *'s is of the third Magnitude, and hath 61 Degrees of Meridian Altitude, and in Colour participates of the ♂ and ♀

2. The fixed Stars all rise, south and set about 4 minutes sooner every Night than they did the Night before; this considered, the exact Time of their Rising, Southing and Setting for any intermediate Night, not herein noted, may be very easily deduced from these Tables, by Inspection only.

To know the Time of the Rising, Southing and Setting of any Star in this Table, for any Day required, it is but considering how many Hours and Minutes that Star Rises, Souths, or Sets, either before or after the 7 Stars on that Day, and you will have your Desire; observing that in this Table, a stands for after, and b for before.

Of the Eclipses that will happen in this Year 1772.

WITHIN the Compass of this Year, six Times will the two great Luminaries of Heaven come within the Ecliptic Boundaries, four of the greater Luminary the Sun, and two of the Moon, they will happen in the following Order.

The first is a solar Defect on *Thursday* the 2d Day of *April*, about our Six o'Clock in the Morning: It is invisible not only to us, but even to all *Europe*: It is only visible in the unknown Northern Parts of the Globe, and there but very small.

The second is a Lunar Eclipse, on *Thursday* the 16th of *April*, about our Three o'Clock in the Afternoon; it will be total with Continuance, but not visible in *England*, nor any Part of *Europe*, but along in the Eastern Coast of *Africa* to the Cape of *Good Hope*, to the southern Parts of the *Red Sea*, from thence crossing *Turkey* in *Asia*, to the Entrance of the *Persian Sea*, and so through the Middle of the *Caspian Sea*, and by the northern Parts to *Tartary*; these Places, I say, will see the Moon rise totally eclipsed: So that all the *East-Indies*, and the Islands in those Seas, will have the Eclipse in their Hemisphere, and in all the Oriental and Southern Oceans beyond the Antarctic Pole this Eclipse will be visible.

The third is another solar Deliquium, and happens on the 2d Day of *May*, at a Quarter before our Ten o'Clock at Night; it will be only visible in the remote southern Parts of the Earth, and there but of small Magnitude.

The fourth is another partial Eclipse of the Sun, and falls on the 26th of *September*, at half an Hour after our Midnight; this is visible also in the unknown southern and remote Parts of the Globe, but it is quite small.

The fifth is a total and visible Eclipse of the Moon, and happens on *Sunday* the 11th of *October*, in the Evening, and only Part will be visible in *England*, if the Air be clear, according to the following Calculation to the Meridian of London.

As the Moon does not rise at *London* till 22 Minutes past 3 o'Clock, which is when the Eclipse is near half over, therefore the Moon rises totally darkened, and will be so near three Quarters of an Hour after she is risen; so that the Eclipse ends about two Hours after the Moon is up.

The

The sixth and last is a solar Eclipse, and a very small one where greatest, and, if the Air be clear, may be discerned by us in *England*; it happens on *Monday, October the 26th* in the Morning, according to the following Calculation. It falls in 3 deg. $\frac{1}{2}$ in *Scorpio*.

October 26th, London.

The Calculations of these Eclipses were transmitted to me by Mr. H. Andrews, Teacher of the Mathematics, at *Roydon* in *Herts*, who computed them from Mr. Professor Mayer's curious and elaborate Theory of the Moon's Motions, according to the Newtonian System of Gravitation, which was sent over here after his Decease.

Mr. H. ANDREWS, Master of the School on *Fish-hill*, in *Roydon*, *Herts*, begs Leave to inform the Public, that he now takes in Boarders (at Twelve Pounds *per Annum*, and a Guinea Entrance) who may be taught by him, with the utmost Care, as follows, *viz.* English Grammar, Writing in all Hands, Arithmetick both Vulgar and Decimal, Book-keeping, Mensuration in all its Branches, Gauging, Surveying, Dialling, and every Part of practical Astronomy, the Use of the Globes, Maps, &c. &c. He also furnishes Gentlemen and others with all Kinds of Barometers and Thermometers at reasonable Rates.

Having given you the Calculations of the Eclipses, I shall now give you my Astrological Judgment of the two visible ones. Having taken a cursory View of them, I find the fiery Planet *Mars* to be the Governor of them both, and if we consult *Ptolemy*, *Haly Bonatus*, and other of our best Astronomers, we shall find all with one Accord to say, that when *Mars* is chief Lord of any Eclipse, he generally threateneth Mischief to all Sorts and Kinds of Men, which shall happen through Excess of Drought; and particularly he causeth intestine Hatreds, Feuds, Quarrels, and Discords among Men, especially of that Kind of Life, *viz.* Soldiers; he excites Men to Robberies on the Land, with Piracies on the Sea, and Tyranny and Rebellion. He also causeth the Wrath of great Men and Kings towards their Subjects and Inferiors; sudden Deaths, Sickneses, especially Tertian Agues and Fevers, and those principally among

among younger Persons, and People in their Prime of Life. In the Air he causeth Extremity of Heat and warm Winds, also Lightning and little Rain; but as we are gotten nearly to the 3d Opposition of the two Superiors, I shall desist, God willing, till another Year. But, as the 53d Aphorism of *Hermes* is come into my Mind, I must give it you, *Fiunt in Mundo multa Incommoda*, &c. In the World many Evils will happen, when in one Month there shall happen a visible Eclipse of both the Luminaries, but chiefly to those Places subject to the Signs in which they happen. And so much for these Eclipses.

Besides these six Eclipses, this Year produces two eminent Oppositions of the two Superiors, and another Opposition of the two Infortunes, in the Signs *Leo* and *Aquary*, which Aspects portend strange and admirable Mutations to happen in the World, especially to those Places, under the said Signs, as *Italy*, *Sicily*, *Bohemia*, and particularly the famous City of *Rome*, from which Parts therefore we may assuredly expect to hear of very great Alterations of Church and State, if not the total Catastrophe of a sovereign Authority. The famous *Spineus* saith, that as *Mahomet* had his Rise from the Influence of the Planets in the watry Trigon, so from the Influence of the superior Planets in the fiery Trigon, shall that Religion receive great Abatement and Molestation, and the Empire of Christians, and the Faith of Christ shall be more enlarged throughout the World. But before these Things be compleated, the Christians shall be at Wars with one another, and shall give Encouragement to the Grand Turk to invade *Europe*. Certainly you the Princes of *Italy*, as also the Roman Pontifex or Conclave of Cardinals of the See of *Rome*, will all of you find great and grievous Distempers in your Governments. God hath prepared a Vial of Wrath, and doth intend to administer it on all *Italy*, and *Rome* in particular. The Pope is in great Distress, and fears a total Subversion of his Territories, and his absurd but gainful Religion. Grim *Saturn's* Foot treads down the pleasant Fertility of her Soil, and his mean Influence will shake the Foundation of the Infalible Chair.

One Generation passeth away and another Generation cometh, but the Earth abideth for ever. It is the Opinion of many learned Men that the Papal State is not only drawing towards its final Period, but even in this very Age it will fall under irretrievable Destruction. The Monarchy and Priesthood of *Egypt*, that flourished so long as to appear in great Part fabulous, are long since extinct; so are the Empires of the Assyrians, of the Medes, and of the Persians; the impetuous one of the Greeks, and the powerful one of the Romans. And all ancient History is full of the incessant Changes and Expiration of innumerable Kingdoms and Commonwealths, of Religions

ligions and Forms of Worship that had subsisted for Ages, and seemed to promise endless Duration. Modern History abounds with like Revolutions, and we have seen in our own Days one Prince set up and another pulled down, Kingdoms transferred, Countries exchanged, Religions altered. What, therefore, should hinder but that the Popedom should be subject to the same Fate, seeing no Constitution is more corrupt, or more ripe for Destruction.

Now I will tell you what the famous *Nostradamus* says, in one of his Prophecies, which is fulfilling near these Times, you may find it in the 1st Century of his Prophecies, and in the 54th Page it runs thus :

Les dieux seront aux humains apparence
Ce qu'ils seront auteurs de grand Conflit
Avant ciel veu serain, Espee & Lance,
Que vers main gauche sera plus grande Affliction.
English.

The Gods shall make it appear to Mankind
That they are the Authors of a great War :
For the Heaven, when serene, shall shew Sword and Lance,
Signifying that on the left Hand the Affliction shall be greater.
He foretelleth here some Prodigies that shall be in the Air, as Swords and Lances after fair Weather, which shall be the Forerunners of great Wars, and chiefly in those Countries that shall be situated on the left Hand of these Prodigies. Which brings me to consider the four Quarters of the Year ;

And

And first of the BRUMAL or WINTER Quarter.

Which takes its Beginning at such Time as the glorious Lamp of Heaven, the Sun, touches the first Point of *Capricorn*, or the Goat, which falls on the 21st of *December*, 1771, at 21 minutes past Eleven at Night. I begin with this Quarter because most of it happens after the new Almanacks come out, and continues till the 20th of *March* following. At this Ingress we have 21 Degrees of *Gemini* on the mid Heaven, and 23 Degrees of *Virgo* on the Eastern Finitor. The Moon is on the *Medium Coeli*, departing from the Sextile of Saturn, and going to the Opposition of the Sun. *Mars* and the *Sun*, and *Venus* and *Mercury* are posited in the 4th, and *Jupiter* on the Cusp of the 5th; and thus are the Heavens posited at this Winter Ingress, which is the Basis of our Judgment for the whole Winter Quarter. The benevolent Aspects both of the superior and inferior Planets preceding and succeeding this Ingress, do signify the strong Endeavours and Pains of many judicious and honest Patriots in several Countries and Kingdoms, to reconcile the apparent Controversies among the Grandees of *Europe*; but we are doubtful of their Abilities to perform or conclude them. We fear that God Almighty hath determined to put into Execution some farther Vengeance and Calamities against many People and Nations, or set on foot unexpected and perhaps continued Wars for the Sins and Transgressions both of the Magistrates and Common People, who having had many Warnings and Admonitions of his Judgments, continue stedfastly in their former Transgressions, notwithstanding; whereby we may judge, they are reserved for a future and more severe Judgment, when Time shall come, as it will, and that very suddenly; for we find that there is in being a cunning and very obstinate People, never contented, who set all their Wits at Work to impede Peace and Quietness by strange Quirks, politick Devices, Forgeries and Surmises, except their new-fangled and self-ended Councils may be held for oracular and orthodox, and themselves reputed the only *Primum Mobile* of this World: And from hence I judge, from the Validity of my Authors, and my own Experience, that you will see and hear of more violent Projects and Undertakings, than are usually done or expected at this Time of the Year, and some Foundation of a Project will be now laid, that the whole Year following will have a large Share of it in every thing.

Divine Urania, pray give Consent

For to contemplate the Firmament;

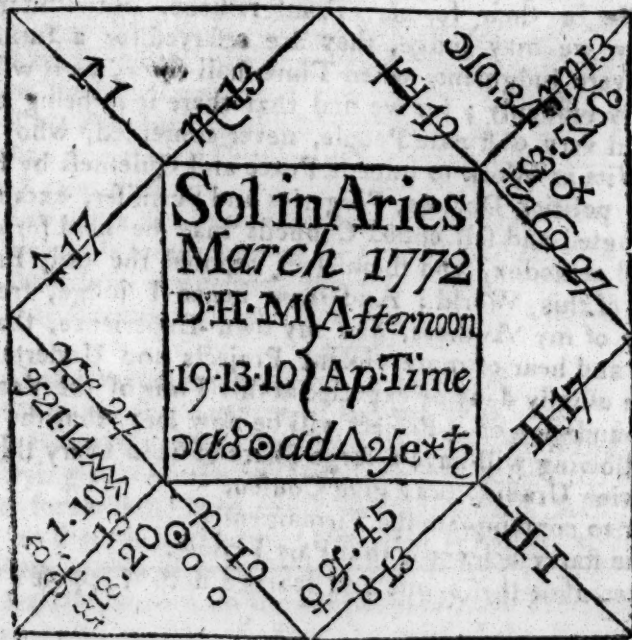

The starry Science is that Part I chose,

Since none that's wise and learned doth it oppose.

Its Enemies are few, Votaries many
 Its noble Structure's scarce env'y'd by any.
 Then as for such as ne'er speak well of one,
 Though Scorn's their Due, I'll let those Fops alone,
 And take a Turn in the Uranian Court,
 Where Art and Nature frequently resort;
 And there observe the Motion of each Sphere,
 As in their Orbs and Order they appear.
 Their Influence we're curious for to know,
 How they incline us Mortals here below.
 Where the Wars are over, and where Peace doth last,
 Of which few tell us that the worst is past.
 Wars in some Places still seem coming on,
 Rapine and Murder's neither fled nor gone.
 What here is said is from th'erratic Stars,
 Hence see what follows, whether Peace or Wars.

Of the SPRING Quarter.

The Revolutions of the Years of the World are usually accounted to take their Initiation of the Time of the Sun's Ingress into the first Point of *Aries*, which happens according to my Tables on *Friday* the 20th of *March*, at Ten Minutes past One in the Morning, at which Time 17 Degrees of *Sagittary* ascends, and 19 Degrees of *Libra* culminates, *Saturn* is in the 8th Retrograde in the 24th Degree of *Leo*, and *Jupiter* in the 2d in 22 Degrees of *Aquarius*, applying to *Saturn* by Opposition; and the rest are exhibited as you may see in the following Scheme.

This Quarter is ushered in with a remarkable Opposition of the two Infortunes *Saturn* and *Mars*, and presently after the Beginning of it is another Opposition of the two Superiors, *Saturn* and *Jupiter*, which cuts out Work enough for those who have Eyes capable of penetrating into Futurity. Among such they make Work enough for the Pen at home, while their Influences make Work enough for the Sword abroad, calls Armies into the Field, and puts them both in Motion and Action where they operate; and I am verily persuaded that the Almighty God of all Principalities and Powers, by his infinite Wisdom and all-seeing Providence, hath intended and proposed, and by these his glorious and powerful Instruments declares and presignifies such notable Accidents and Transactions, such unexpected Commotions and various Mutations, to all or most of the principal Kingdoms and Nations in the World, as well in *Asia* as *Europe*; and among the Kings, Rulers, and Nobility of those Places, as have not usually happened; many subtle and private Conspiracies against legal Governors and Government. Insurrections, popular Murmurings, and Augmentations of Wars, Tumults, and Commotions; Death of Corn, and Destruction of Cattle great and small. Piracies by Sea; Fires and Robberies by Land; strange and unusual Diseases in the Body of Man. But after all, my Reader may say, this is but a general Judgment, and that he expects I should be more particular as to Time and Place, when and where such like Accidents should happen; and especially in Regard to our own Nation, if we are like to be involved in any of these Calamities, or how far we may be able to extricate ourselves from them. To which I answer, we are to look as far back as to the great Conjunction of the two Superiors in March 1762, as the Source and Foundation of our present Judgment; and that all succeeding Aspects and Positions since that Time, are only to be considered as forwarding or remitting the Influence thereby intended, which was something of the like Nature as is before expressed; and that the Conjunction being celebrated in *Aries*, an Equinoctial and moveable Sign, and the first of the fiery Triplicity, had Significations in Matters of State and Religion. And, for the Places concerned, in my astrological Judgments for that Year, I said that great and material Accidents are hereby signified, and those too of a malignant Nature, and *England* is like to be concerned herein, as indeed are most Nations of *Europe*. I said also, that this Conjunction would relate to, and shew its Power on all Men and Things in the World, either for Good or Ill; but I would not be understood that all should be affected at the same Time with it, but its Influence would wander from one Country to another,

ther, and from one Part of the World to another in Time, and the Effects will be in force for Twenty Years to come. And what a near Analogy the Judgments then given upon that Conjunction hath had with the publick Affairs in the World since that Time, is evident to every one; and from that Time to this we have not had so probable a Position to stimulate and bring into Act the Matters thereby pre-signified, as we have in the present Year. *Saturn* and *Mars* are in Opposition a little before the Equinox, and *Saturn* and *Jupiter* just after from fixed Signs, and again reiterated on the 1st of *August*, and *Mars* again had lately been in Square to them both, and *Mercury* at the same Time opposes *Jupiter* and joins with *Saturn*, which, with the malevolent Positions at the Ingresses in this Year, we have Ground enough to suspect that it will be a more active Year than any since the Time of that Conjunction in 1762, and that the Affairs of many Nations are in a very bad Posture. And so I conclude the Spring Quarter with these few poetical Lines, and proceed to the Summer Quarter.

Now, for Conclusion of this Quarter, I
 Shall leave the rest to those that more can spy;
 And tell the World where Things are in Confusion,
 And when they shall come to a good Conclusion.

Of the SUMMER Quarter.

The Summer Quarter beginneth at such Time as the Sun toucheth the first Scruple of *Cancer*, which happens this present Year on *Saturday, June* the 20th, at half an hour past Eleven at Night, at which Time 22 Degrees of *Sagittary* are on the mid-Heaven, and 10 Degrees of *Pisces* are on the Ascendant. *Saturn* and *Venus* are in the 6th, the *Sun* in the 4th, *Mercury* in the 3d, *Mars* in the 2d, and *Jupiter* and the *Moon* just risen into the 12th. Now the Planets are more amicably disposed than they were at the last Ingress, and the Trine of the *Sun* to *Jupiter* shews that some honest upright Men are willing to endeavour to allay the Animosities of these tumultuous Times; but the approaching Quartiles of *Mars* to the two Superiors, and the Opposition of the Superiors themselves, give Reason to fear that the Affairs of many Countries in *Europe* are in a disturbed and unsettled Condition. Some considerable martial Preparations are now making, and Religion and its Cause are mightily in the present Transactions of these Times; many doubtful Accusations, and uncertain Informations against great Persons in the Courts of Princes, and many are tossed sufficiently upon the Waves of Trouble and Vexation, which brings me to

The

The AUTUMN Quarter.

The Autumnal Quarter usually initiates when the Earth enters the Equinoctial Sign *Aries*, or, according to old Conceit, when the *Sun* enters *Libra*, and which will be this Year, on *Tuesday* the 22d of *September*, at One in the Afternoon. In this Ingress all the Planets are above the Earth except *Jupiter*, who is in the 2d House, *Mars* is angular in the 7th, and the Opposition of the two Superiors is again reiterated in the very Beginning of *Virgo* and *Pisces*. The Actions of this Quarter I conceive will be very violent and busy, such Hurly-burlys, Differences, and Disturbances about Rights, Privileges, Laws, and Customs, as will raise much Contention, if not Bloodshed. I heartily wish for a good Understanding between us and our Allies, and that no Popish Intrigues may prevail, to make a Breach to the Prejudice of *Great Britain*.

Let us implore Heaven for Mercy, and strive our Lives to amend, and to get the Victory over our Sins and sinful Passions; let us labour for that rare Ornament of Christian Charity, and not ruin and tear one another to Pieces for Trifles.

Let us all our Concerns to Heaven commend,

For our King's Safety let us ever pray;

Our sinful Lives let's all strive to amend,

Use Christian Charity, for that's the Way

In smoothest Steps to make us all unite,

Peace, and all other Blessings to invite.

I did design to have given my Readers a short History of Comets, with their Significations, because the Appearances of them are more frequent than formerly; for within the Space of sixteen Months we have been visited with no less than four Comets: But, as my Book is at an End, I must postpone it, God willing, till another Year.

Thus through each Season I have traced the Sun,

And one more tedious Twelvemonth's Task have done.

If it but please, as I do hope it will,

I shall encouraged be to serve them still,

And once again *Urania's* Court survey,

That I the next Year's Actions may display.
